# C# or VB .NET Developer Required

## Based: West Cambridge

## £ Competitive

### Overview

Labmotive is a small company that has been writing industry leading software for the Water Industry since 2006. Building on strong recent performance we are looking to recruit new team members to help us expand.

The current role is for a .NET developer to join the team responsible for Labmotive's flagship product **Remote Sampler**.

**Remote Sampler** is a sophisticated remote data capture application that runs on a variety of Windows based tablet PCs. The application also features several Windows services that handle communications between tablet PCs and existing laboratory systems and a desktop client that allows work assignment and reporting.

The successful candidate will provide a professional contribution to project development focussing primarily on testing and support with the opportunity to expand into other roles with experience.

As a rapidly expanding small company, the successful candidate must also be prepared to tackle problems outside the bounds of a purely technical role. As the company grows there will be great scope to define your own role as well as influencing the direction of the organisation as a whole.

We can offer extensive training in the latest software development technologies and practices. No prior experience of Microsoft .NET languages is required.

### Duties and Responsibilities

- The roll is based initially at the ideaSpace West Cambridge site with the potential of moving to other Cambridge area premises as the company expands.
- Will report to the Remote Sampler lead developer.
- Responsible for producing high-quality code according to Labmotive's standard operating procedures.
- Work in conjunction with other members of Labmotive's distributed development and testing team.
- Will have extensive opportunity to influence design and architecture decisions.
- Produce thorough supporting documentation.
- Participate in project planning and provide development task estimates.
- Frequent client-facing onsite work on customer premises around the UK.

### Minimum Requirements

- A good degree from a top tier university in a science or mathematically-based subject
- Excellent computer literacy
- Experience with basic software principles
- A desire to learn and continue to develop your skills
- Ability to work under pressure to deadlines and within a team environment is essential
- Excellent communication skills
- Proficient with the use of Microsoft products (e.g. Word/Excel/Powerpoint/Outlook)

### Beneficial but not Essential

- Knowledge of a .NET language (VB preferred) and Visual Studio
- Knowledge of object-oriented programming principles
- Knowledge of SQL Server and/or Oracle databases
- Experience with a source control system (e.g. SVN or GIT)
- Experience in with Agile Development (e.g. SCRUM or KANBAN)
- Experience with unit testing frameworks (NUnit)
- Experience with a continuous integration environment
- Experience with the Infragistics .Net controls library
- HTML/CSS/Javascript

If this role is of interest to you, please send a copy of your full CV and a cover letter to careers@labmotive.com. For more information about Labmotive, please visit our website www.labmotive.com.
